ZERION PAR-022

Kura Sushi, Inc.

Paradigm Alignment Report

Automated conveyor-belt sushi, standardized restaurant operations, and scalable Japanese dining.

Field	Assessment
Input Ticker	2695.jp
Normalized Ticker	2695.JP
Company / Asset	Kura Sushi, Inc.
Classification	Paradigm Aligner / Restaurant Automation Participant
Paradigm	Automated conveyor-belt sushi, standardized restaurant operations, and scalable Japanese dining.
Status	Initial PAR draft; not investment advice

Investment Objective Lens: Zerion v1.8 seeks credible 10x opportunities, treats a credible 5x path as the minimum initial research threshold, and requires inversion discipline before commitment.

1. Executive Summary

Kura Sushi, Inc. is assessed under the Zerion Paradigm Alignment Manual v1.8 using PAR, PAM, CFF, PLS, SAM, TPO, EPC, REI, TVI, scenario analysis, and the 10x/5x underwriting lens.

H1 FY2026 sales about ¥125.2B (+6.5%), operating profit about ¥2.9B (-2.5%), with domestic and international expansion continuing.

Initial view: PAR 6.5/10, PAM 6.0/10, CFF 70/100. The main question is whether the relevant paradigm can translate into retained economic participation capacity, not merely whether the theme itself is attractive.

2. Current Market Snapshot

Metric	Snapshot
Ticker	2695.JP
Company / Asset	Kura Sushi, Inc.
Latest operating / market notes	H1 FY2026 sales about ¥125.2B (+6.5%), operating profit about ¥2.9B (-2.5%), with domestic and international expansion continuing.
Refresh note	All market data is point-in-time and should be refreshed before investment use.

3. Zerion Score Summary

Framework	Score	Interpretation
PAR	6.5/10	Structural alignment with the stated paradigm.
PAM	6.0/10	Adoption, ecosystem, institutional, and capital validation.
CFF	70/100	Survivability after inversion; higher is better.
Confidence	Initial / evidence-dependent	Public sources support an initial report; full underwriting requires refreshed filings and valuation work.

4. Paradigm Overview

Automated conveyor-belt sushi, standardized restaurant operations, and scalable Japanese dining.

TPO includes Japanese dining, global sushi demand, automation-enabled restaurants, and overseas store expansion. EPC comes from brand, format, operations, and supply chain.

PLS summary: Japan store base: Consolidation; overseas expansion: Validation to Expansion; restaurant automation: Expansion.

5. PAR Assessment

PAR Component	Weight	Score	Weighted	Rationale
Paradigm Strength	15%	6.0	0.90	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.
Friction Reduction	15%	7.0	1.05	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.
Commercial Readiness	20%	7.5	1.50	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.
Ecosystem Potential	15%	5.5	0.82	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.
TPO	15%	6.0	0.90	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.
EPC	20%	6.5	1.30	Score based on paradigm quality, readiness, opportunity field, and value-capture logic.

6. PAM Assessment

PAM Pillar	Weight	Score	Evidence Logic
Commercial Adoption	25%	6.5	Initial score based on the snapshot, adoption evidence, ecosystem breadth, institutional access, and capital momentum.
Ecosystem Expansion	25%	6.0	Initial score based on the snapshot, adoption evidence, ecosystem breadth, institutional access, and capital momentum.
Institutional Validation	25%	6.0	Initial score based on the snapshot, adoption evidence, ecosystem breadth, institutional access, and capital momentum.
Capital Momentum	25%	5.5	Initial score based on the snapshot, adoption evidence, ecosystem breadth, institutional access, and capital momentum.

7. CFF Assessment

CFF Factor	Weight	Score	Inversion Logic
Technology Validation	20%	80	Initial survivability score based on failure-mode exposure and mitigation evidence.
Commercial Viability	15%	65	Initial survivability score based on failure-mode exposure and mitigation evidence.
Funding & Liquidity	15%	65	Initial survivability score based on failure-mode exposure and mitigation evidence.
Regulatory & Political Risk	10%	75	Initial survivability score based on failure-mode exposure and mitigation evidence.
Governance & Management	10%	70	Initial survivability score based on failure-mode exposure and mitigation evidence.
Trust & Credibility	10%	75	Initial survivability score based on failure-mode exposure and mitigation evidence.
Ecosystem Dependence	10%	65	Initial survivability score based on failure-mode exposure and mitigation evidence.
Competitive Threat	10%	65	Initial survivability score based on failure-mode exposure and mitigation evidence.

8. PLS and SAM

Area	Assessment
Paradigm Lifecycle Stage	Japan store base: Consolidation; overseas expansion: Validation to Expansion; restaurant automation: Expansion.
Stakeholder Alignment	Customers/users and capital providers generally benefit when the paradigm reduces friction; regulators, incumbents, suppliers, and competitors may accelerate or block adoption depending on incentives.

9. TPO and EPC

TPO includes Japanese dining, global sushi demand, automation-enabled restaurants, and overseas store expansion. EPC comes from brand, format, operations, and supply chain.

10. Inversion Analysis

• Overseas stores fail to reach attractive unit economics.

• Labor/rent/food costs compress margins.

• Food-safety incident damages trust.

• Same-store traffic slows.

• Expansion consumes capital faster than returns.

11. 10x / 5x Underwriting Lens

Underwriting Test	Formula	Interpretation
5x hurdle	Current value x 5	Requires about 17.5% CAGR over 10 years.
10x hurdle	Current value x 10	Requires about 25.9% CAGR over 10 years.
Primary question	TPO x EPC x survivability	Theme exposure is insufficient without value capture and CFF survivability.

12. Scenario Analysis

Scenario	Description	Key Conditions
Bull / 5x	Paradigm adoption compounds and participant captures durable economics.	Commercial adoption, capital migration, and EPC improve.
Extreme Bull / 10x	Participant becomes a bottleneck or operating layer for the paradigm.	Large TPO, high EPC, durable PAM, and manageable CFF.
Base	Company/asset remains relevant but returns are limited by valuation, cycles, or competition.	Growth continues but multiple expansion is limited.
Bear	Thesis fails or value capture migrates elsewhere.	CFF risks materialize or capital exits the thesis.

13. REI / TVI Dashboard

Area	Early Warning	Positive Validation
Commercial	Revenue/usage weakens or fails to convert into profits.	Adoption grows with improving margins or fee economics.

Area	Early Warning	Positive Validation
Capital	Liquidity, valuation, or financing conditions deteriorate.	Capital access improves and supports productive investment.
Regulatory	New rules constrain product, market access, or economics.	Clearer rules increase institutional participation.
EPC	Value leaks to partners, suppliers, or competitors.	Participant controls the bottleneck and captures economics.

14. Source-Checked Notes

This initial report uses public-company disclosures, official IR pages where available, market-data snapshots, and sector-specific judgment. It should be refreshed before investment use. The v1.8 manual treats formulas as diagnostic tools, not final conclusions.

15. Initial Zerion Conclusion

Kura Sushi, Inc. receives an initial PAR of 6.5/10, PAM of 6.0/10, and CFF of 70/100. The report should be treated as an initial PAR screen rather than a complete investment memo. Next work: update market data, build valuation and scenario models, and maintain REI/TVI monitoring.
